Fund Portrait

The fund invests in a globally diversified equity portfolio based on the MSCI World Index, as well as in money market instruments. The fund is suitable for investors who wish to systematically manage their equity allocation between 0% and 100%. Using a series of quantitative indicators, the portfolio allocation is regularly and dynamically adjusted to the prevailing risk conditions in the market. The fund aims to generate an appropriate return while reducing the risk of loss compared to a buy-and-hold equity investment. The reference currency is CHF and the foreign currency risk is not hedged.
